

## **Position: Senior Java Developer**

Experience: 4-8 years

Location: Indiranagar, Bangalore (onsite)

Employment Type: Full-time

Notice Period: Immediate to 2 weeks

### **Job Description:**

We are looking for a Senior Java Developer with at least 4 years of experience in IT systems analysis and application program development. The ideal candidate should have a strong background in Object-Oriented Programming and be able to write efficient and scalable code.

### **Key Responsibilities:**

- Develop, test and maintain high-quality software using Java and RESTful API.
- Work on backend development using AWS cloud technologies.
- Collaborate with cross-functional teams to design and implement new features.
- Participate in code review, testing and deployment.
- Identify and troubleshoot software issues and bugs.
- Stay up-to-date with emerging trends and technologies in software development.

### **Required Skills:**

- Strong proficiency in Java and RESTful API development.
- Solid understanding of Object-Oriented Programming (OOP) concepts, workflows, and design patterns.
- Experience with AWS Cloud technologies (optional but good to have).
- Hands-on experience in Agile/Scrum development methodologies.
- Excellent problem-solving and analytical skills.
- Good communication and interpersonal skills.
