

Position: IT Business Analyst

Experience: 2-5 years

Location: Indiranagar, Bangalore (onsite)

Employment Type: Full-time

Notice Period: Immediate to 2 weeks

Job Description:

We are looking for a skilled IT Business Analyst to join our team. The ideal candidate should have 2-5 years of experience in requirement gathering, documentation and analysis, proposing solutions to client requirements, leading and managing multiple projects end to end, and client interaction as needed for project execution. The candidate should also have experience in proposing enhancements for the next phase of projects, managing multiple client engagements, project tracking, risks and mitigation planning. Experience working in the finance domain is highly preferred.

Key Responsibilities:

- Collaborate with clients to identify business requirements and propose solutions that align with technical and budget feasibility.
- Facilitate communication and bring clarity in work scope between the development team and clients.
- Conduct gap analysis to identify areas where improvements can be made.
- Work closely with the development team to ensure project requirements are understood and translated into technical specifications.
- Develop and maintain project documentation such as user stories, functional requirements, and use cases.
- Manage project scope, timeline, and budget to ensure successful project delivery.
- Facilitate project meetings and ensure key stakeholders are kept informed of project progress.
- Identify project risks and develop mitigation plans.
- Provide support for UAT and assist in defect triage.

Required Skills:

- 2-5 years of experience in requirement gathering, documentation and analysis, and proposing solutions to client requirements.
- Strong communication skills and ability to facilitate communication between clients and the development team.
- Strong problem-solving skills and ability to conduct gap analysis to identify areas where improvements can be made.
- Excellent documentation skills and ability to develop and maintain project documentation such as user stories, functional requirements, and use cases.

- Experience in managing project scope, timeline, and budget to ensure successful project delivery.
- Experience in identifying project risks and developing mitigation plans.
- Experience in supporting UAT and assisting in defect triage.
- Experience working in the finance domain is highly preferred.
